GLEDOPTO CO., LTD

# About Gledopto

GLEDOPTO CO.,LTD devotes itself to developing new products with new idea or new technology. We always follow the tenet of "good faith cooperation to create a win-win situation",and insist on "good quality is our responsibility to customers, good quality is the only sustainable condition" to provide customers with first-class products, first-class technical support and first-class service.

GLEDOPTO CO.,LTD is a manufacturer specializing in the research, development and production of LED lights, which has two LED business groups.

One is Traditional LED Business Group (TLBG) located in Zhongshan since 2005.Our LED lighting products mainly include: LED tubes, LED spotlights, LED bulbs, LED strips indoor and outdoor, LED bars indoor and outdoor, LED modules indoor and outdoor, LED bulb, and so on. Our products have been exported to Europe, North America, Southeast Asia, Middle East, etc. Our products have CE certification and RoHs compliance for Europe market, and PSE for Japan market, C-tick for Australia market, etc.

The other is Smart LED Business Group (SLBG) located in Shenzhen since 2010. Innovation is the aim of our work.. We make our traditional LED products reborn with our new RF remote control technology and rich LED experience. There are four stages for Intelligent LED products.

Stage 1: 433.92Hz RF LED strip controller.  
Main Features: Touch control, long remote control range.

Stage 2: 2.4GHz RF LED controller, CCT LED bulb, RGB LED bulb, Panel light, Flood light, etc  
Main Features: Excellent synchronization, Variety ,Touch screen control.

Stage 3: Smart phone-control LED products. Wifi LED strip controller, Wifi LED bulb, Wifi LED downlights,wallmounted controller etc

Stage 4: Bluetooth RGB+dual white,RGBW,RGB indoor and outdoor seires. Bluetooth LED strip controller, Bluetooth LED bulb, Bluetooth LED garden lamp,flood light,etc.

Stage 5: 2.4G/RF RGB+W collection with 8-zone remote control; RGB+CCT collection with 6-zone remote control. Besides, we have a new try on Zigbee light link collection that are compatible with philps hue,Osram and Ikea,etc. We give more options to our customers from a closed circle to a open platform. Will improve and better our user experience.

Main Features: Smart phone-control, remote control through internet, control system.

### Battery Installation

Please take the remote control and carefully press the battery cover and push it away in a downward motion. Install two AAA batteries ,exactly match the negative ( - ) pole of each battery to the largest spring.Don't touch the color ring when you install the batteries.Place the battery cover back and install tightly.

### Saturation control—White and RGB CO-exist(For RGBW only)

Long press M button,go to Saturation mode, r/g/b/w co-exsit, you can choose any color,and change the brightness of white.

### Saturation control—White and RGB CO-exist

Long press M button,go to Saturation mode, r/g/b/c/w co-exsit, you can choose any color,and change the brightness/color-temperature of white.

### Link / Unlink

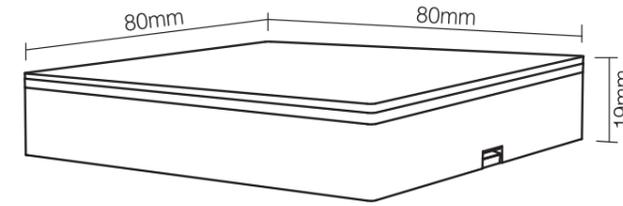

Link: First power off, then power on, within 3 seconds touch any of the Zone ' | ' button 3 times shortly, the link is done when you see the light blinks 3 times,otherwise try again later.

Unlink: First power off , then power on , within 3 seconds touch the linked Zone ' | 'button or the Master ' | ' button 5 times shortly , the unlink is done when you see the light blinks 9 times, otherwise try again later.

# RGBW RGB+CCT Panel Remote Controller

( Battery powered verison )

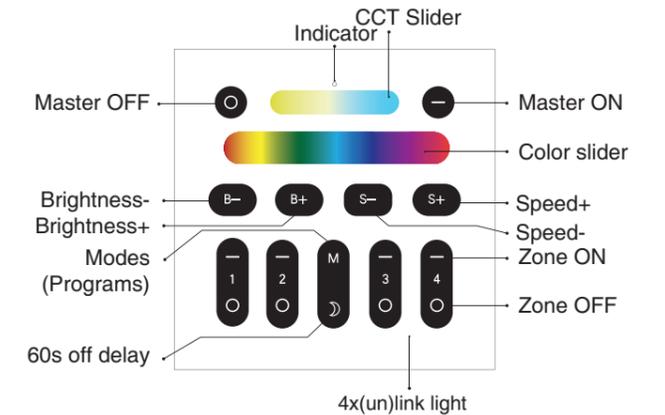

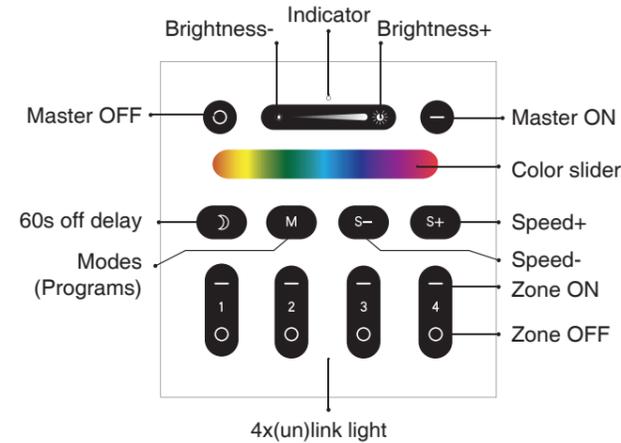

{ 60s off delay  
Saturation mode }

## Parameter

- 1 / Size: 80x80x19mm
- 2 / Working Temperature: -20~60°C
- 3 / Input Voltage: 3V(2\*AAA Battery)
- 4 / Radio Frequency: 2400-2483.5MHz

- 5 / Modulation Method: GFSK
- 6 / Transmitting Power: 6dBm
- 7 / Control Distance: 30m
- 8 / Standby Power: 15uA

## Link / Unlink

**Link:** First power off, then power on, within 3 seconds touch any of the Zone ( - )button 3 times shortly, the link is done when you see the light blinks 3 times,otherwise try again later.

**Unlink:** First power off , then power on , within 3 seconds touch the linked Zone( - )button or the Master ( - ) button 5 times shortly , the unlink is done when you see the light blinks 9 times, otherwise try again later.

## Progarms(RGBW)

- **Program 1 (Fade in and fade out)**  
Seven colors fade into each other.
- **Program 2 (Strobe white)**  
Just white color Flashes up.
- **Program 3 (Color Flash)**  
In this program,red,green,blue,yellow,purple,light blue,white Flashes to change.
- **Programs 4 (RGBW fade in fade out)**  
This program fades in and fades out the color red,green,blue and white one after another.
- **Programs 5 (Disco)**  
Different colors strobe and Flash to change randomly.
- **Programs 6 (Red light SOS mode)**  
In the program,red color brightens from 0%-100% and shuts down, the Flashes three times.
- **Programs 7 (Green light SOS mode)**  
In the program,green color brightens from 0%-100% and shuts down, the Flashes three times.
- **Programs 8 (Blue light SOS mode)**  
In the program,blue color brightens from 0%-100% and shuts down, the Flashes three times.
- **Programs 9 (All in one)**  
all the above 8 modes perform one afer another.

## Progarms(RGB+CCT)

- **Program 1 (Fade in and fade out)**  
Seven colors fade into each other.
- **Program 2 (Strobe white)**  
warm white and cool white color Flashes up.
- **Program 3 (Color Flash)**  
In this program,red,green,blue,yellow,purple,light blue,warm white and cool white Flashes to change.
- **Programs 4 (RGBW fade in fade out)**  
This program fades in and fades out the color red,green,blue ,warm white and cool white one after another.
- **Programs 5 (Disco)**  
Different colors strobe and Flash to change randomly.
- **Programs 6 (Red light SOS mode)**  
In the program,red color brightens from 0%-100% and shuts down, the Flashes three times.
- **Programs 7 (Green light SOS mode)**  
In the program,green color brightens from 0%-100% and shuts down, the lashes three times.
- **Programs 8 (Blue light SOS mode)**  
In the program,blue color brightens from 0%-100% and shuts down, the Flashes three times.
- **Programs 9 (All in one)**  
all the above 8 modes perform one afer another.

Smart Panel Remote Controller is a newly developed remote controller. This Panel remote controller is designed by a delicate and fashionable tempered glass panel; And we adopt a high precision Capacitive touch screen IC. Touch Screen is very stable;2.4GHz high RF wireless control with long distance controlling, low power consumption and high speed transmitting rate.This product widely work on our smart LED Lighting, LED Controller and Smart panel controller, etc.

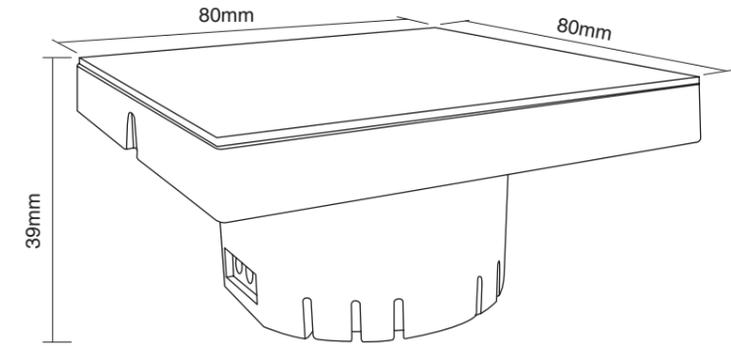

## 2.4G RF WALL TOUCH PANEL REMOTE

WITH 4-ZONE REMOTE CONTROL

Smart Panel Remote Controller is a newly developed remote controller. This Panel remote controller is designed by a delicate and fashionable tempered glass panel; And we adopt a high precision Capacitive touch screen IC. Touch Screen is very stable; 2.4GHz high RF wireless control with long distance controlling, low power consumption and high speed transmitting rate. This product widely work on our smart LED Lighting, LED Controller and Smart panel controller, etc.

### Parameter

- 1 / Operating Voltage Range: 100~240 VAC
- 2 / Standby power: <0.1W
- 3 / Operating Temperature Range: -20~60°
- 4 / Maximum control Range: 100 feet (30m)
- 5 / RF Operating Frequency: 2.4GHz

- 6 / Surface material: Glass
- 7 / Body Material: PC
- 8 / Dimensions: 80X80X39mm
- 9 / Warranty: 2years
- 10 / Indoor use only

### Function

#### 1. Master On(-)/Off(O)

Acts as a master On(-)/Off(O) control for all paired RGB(W) lights. Also activates the "Master" function, which allows the remote to control the RGB(W) lights of all zones. If a zone is currently active, pressing the master On (-) button restores the "Master" function to the remote.

#### 2. Selection LED Indicator

Flashes once to indicate when a command has been selected.

#### 3. Brightness Touch Slider - Increase(Right Side)/Decrease(Left Side)

Increases(right side) or decreases(left side) the brightness level. Changing the active mode resets the brightness level to full.

#### 4. Color Selection slider

Directly selects color on the bar. To obtain white light only, keep the "Zone On" (|) button depressed until the light changes to a steady bright white.

#### 5. Mode Speed Increase(S+)/Decrease(S-)

Increases (S+)/decreases(S-) the tempo of the mode pattern currently active.

#### 6. Mode Start/Scroll(M)

Modes feature different color combinations, light transitions, and patterns, with 9 distinct modes. This button initiates the Mode function and scrolls through the modes in ascending order.

#### 7. Zone On(|)/Off(O) - Zones 1-4

Allows up to four "zones" (i.e. channels) of RGBW lights to be separately paired, and controlled by the remote. Pressing one of the Zone On(|) buttons activates that zone; commands will affect only lights in that zone. Once paired to a zone, lights remain paired until they are unpaired. Steadily depressing the Zone On(|) button restores the lights in that zone to white.

### Link / Unlink

#### Pairing a Light to the Remote

1. Switch off the main power supply to the light.
2. Restore power and within 3 seconds, choosing one of the "Zone On" (|) buttons, depress the button. It will Flash white 3 times, indicating that the light is now paired to that numbered zone and can be controlled via the remote.

#### Activating a Zone

To activate a specific zone, depress the "Zone On" (|) button. The zone is now active and remote commands will only affect lights paired to that zone.

#### Unpairing a Light to the Remote

1. Switch off the main power supply to the light.
2. Restore power and within 3 seconds, depress the "Zone On" (|) button until the light Flashes 10 times, indicating that the light has been unpaired.

An unlimited number of RGBW lights can be paired to a zone, and all lights paired to that zone will respond to the commands entered on the wireless remote. Conversely, a single RGBW light can be paired to up to five remotes. Note: The wireless remote operates using radio frequency. The remote controller's use is not restricted by normal obstructions such as walls, doors, etc. Once paired they can be installed anywhere in range of the remote (up to 100 ft. or 30m)

**Auto-transfer**

How to link:

When Switch on the lights in the zone you want to link, press zone-on button within 3 seconds, the link is done when the lights blink 3 times. The link-signal will be auto-transferred to another.

Notice:

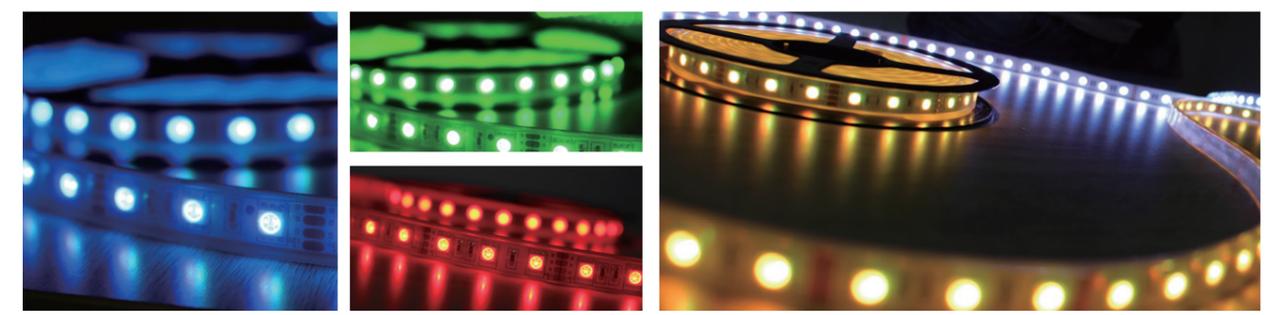

1. In the same zone. Each light only auto-transfers and response to the different signal received last time in the same zone.
2. Auto-transfer can happen among different groups, the lights receive the signal from the lights in the different zones, only transfer the signal, don't response.

How to unlink:

When Switch on the lights in the zone you want to unlink, press zone-on button 5 times within 3 seconds, the unlink is done when the lights blink 9 times. The unlink-signal will be auto-transferred to another.

**Auto-sync**

Each light can transmit the signal after the specific time and auto-transfer.

- 7 / Life span: 50,000h
- 8 / Package: 232x176x68mm
- 9 / Net weight: 1230g
- 10 / Gross weight: 1300g
- 11 / Compatible with wifi bridge
- 12 / warm white 600-650lm Red 500-600lm  
Green 400-500lm Blue 120-150lm

## DIMENSIONS:

# 30W FLOOD LIGHT

Item No.:GL-FL-003

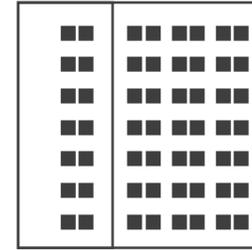

EPILEDs

# 50W FLOOD LIGHT

Item No.:GL-FL-004

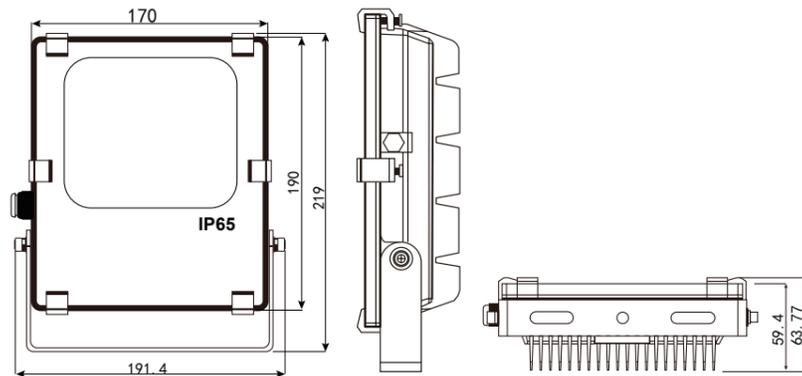

EPILEDs

## Parameter

- 1 / Power:30W RGB+10W warmwhite 2700K EPILEDs
- 2 / Remote range: 30 meters
- 3 / Input voltage: AC100-240V (Mean Well driver)
- 4 / Material: Aluminum,toughened glass
- 5 / LED color:RGBW
- 6 / Working temp: -20~60°C
- 7 / Life span: 50,000h
- 8 / Package: 248x194x68mm
- 9 / Net weight: 1500g
- 10 / Gross weight: 1800g
- 11 / Compatible with wifi bridge
- 12 / Warm white 750~800lm Red 700-800lm  
Green 600-700lm Blue 200-250lm

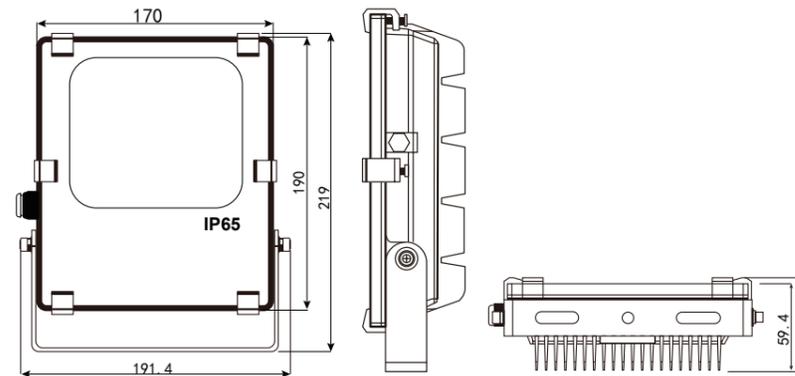

## DIMENSIONS:

## Parameter

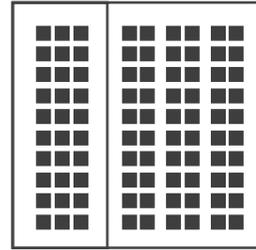

- 1 / Power:50W RGB+16W warmwhite 2700K EPILEDs
- 2 / Remote range: 30 meters
- 3 / Input voltage: AC100-240V (Mean Well driver)
- 4 / Material: Aluminum,toughened glass
- 5 / LED color:RGBW
- 6 / Working temp: -20~60°C
- 7 / Life span: 50,000h
- 8 / Package: 248x194x68mm
- 9 / Net weight: 1500g
- 10 / Gross weight: 1800g
- 11 / Compatible with wifi bridge
- 12 / Warm white 1100~1200lm Red 1000-1100lm  
Green 900-1000lm Blue 300-400lm

## DIMENSIONS:

# 90W FLOOD LIGHT

Item No.:GL-FL-005

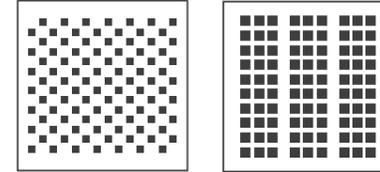

EPILEDs

# 190W FLOOD LIGHT

Item No.:GL-FL-008

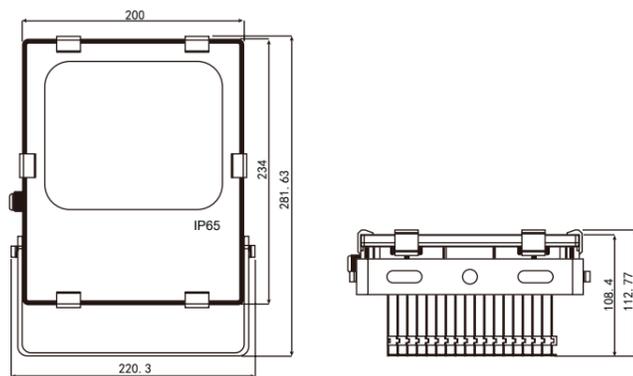

EPILEDs

## Parameter

- 1 / Power:60W RGB+30W warmwhite 2700K EPILEDs
- 2 / Remote range: 30 meters
- 3 / Input voltage: AC100-240V (Mean Well driver)
- 4 / Material: Aluminum,toughened glass
- 5 / LED color:RGBW
- 6 / Working temp: -20~60°C
- 7 / Life span: 50,000h
- 8 / Package: 290x255x125mm
- 9 / Net weight: 2600g
- 10 / Gross weight: 3000g
- 11 / Compatible with wifi bridge
- 12 / Warm white 2400~2700lm Red 1200-1300lm  
Green 1000-1100lm Blue 350-450lm

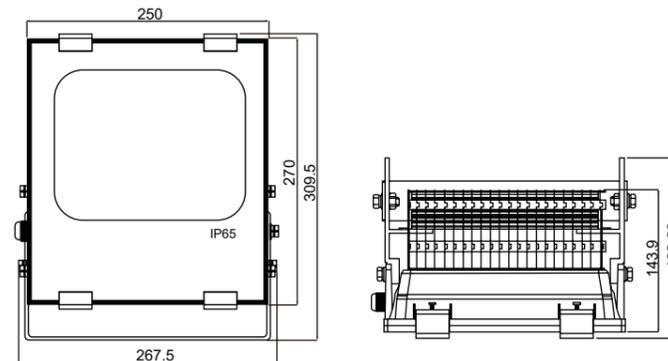

## DIMENSIONS:

## Parameter

- 1 / Power:90W RGB+100W warmwhite 2700K EPILEDs
- 2 / Remote range: 30 meters
- 3 / Input voltage: AC100-240V (Mean Well driver)
- 4 / Material: Aluminum,toughened glass
- 5 / LED color:RGBW
- 6 / Working temp: -20~60°C
- 7 / Life span: 50,000h
- 8 / Package: 370x350x250mm
- 9 / Net weight: 5000g
- 10 / Gross weight: 6000g
- 11 / Compatible with wifi bridge
- 12 / Warm white 7000~7500lm (2700-3000K)  
Red 1000-1200lm Green 2000-2200lm  
Blue 400-500lm

## DIMENSIONS:

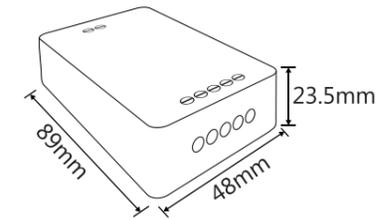

# LED CONTROLLER

## ZIGBEE LIGHT LINK COMPATIBLE

Size: 23.5x48x89mm  
 Input Voltage: DC12-24 V  
 Output Current/Channel: 6 A max  
 Protection rate: IP20  
 Total Output Current: 15 A max  
 Operating Temperature: -20°C~60°C  
 Common Anode  
 Constant Voltage

Thanks for buying our products.  
 In this manual we will explain the connection of wires and the connection with a ZigBee Light Link Gateway.  
 These devices work with many ZigBee Light Link Gateways\* like Philips Hue, OsramLightify\*\* or IKEA Tradfri\*\*\*.

### Wire Connection:

1. Please prepare the cable like picture P1 and strip the isolation to 9-10 mm. The cable cross-section must be between 0,33 and 2,08mm<sup>2</sup>(AWG22-14).
2. Now push down the terminal with a screwdriver and put in the cable, see picture P2.
3. Take the screwdriver away and the cable is connected with the terminal.

On picture P3-P7 you can see examples for the connection of different LED controllers:

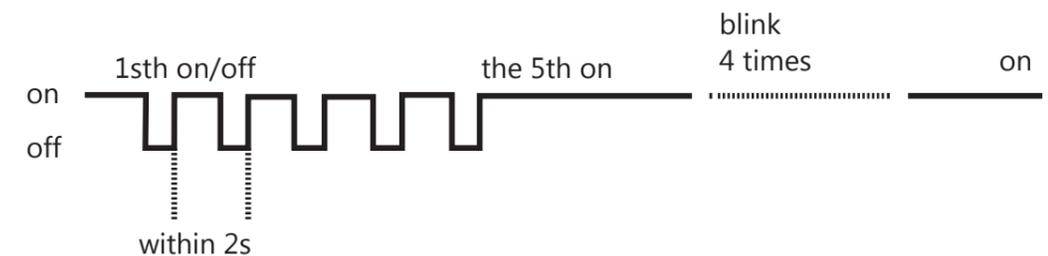

- P3 for RGBW/RGBWW products
- P4 for RGB products, use a RGBW controller and don't connect the wire W
- P5 for single color LED product, use a RGBW controller and don't connect the wire R, G, B
- P6 for RGB+CCT(warmwhite+coldwhite) products
- P7 for CCT(warmwhite+coldwhite) products

### Connection with Gateway:

1. Connect the LED product to the controller see section "wire connection".
2. Start the device searching on the ZigBee Light Link Gateway, it could take some time. If the Gateway does not find the device, plug power off/on or make a reset.
3. The Gateway found your device and you can assign it to the different rooms/zones/groups.
4. Now you can use the device.

### Reset:

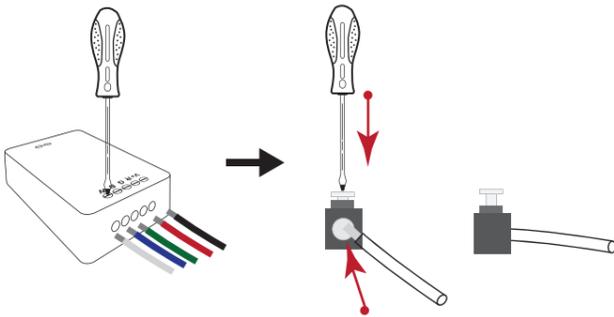

1. Switch on your device.
2. Now switch off and on within 2 seconds.
3. Repeat off/on four times.
4. Reset is done when the device is switched on in the fifth time and the light stays on after blinking 4 times.

\*For RGBW/RGBWW devices you will find two SSIDs. One for white/warmwhite, the other for RGB.  
 \*\*The Osram Gateway supports only one SSID, with the RGBW/RGBWW device it finds only RGB.  
 \*\*\*IKEA Gateway will support RGB devices till the end of the year 2017.
