**Upgrade system requirements**: Windows 7 or newer version of Windows system

Step 1: Press and hold the hidden button of MPC-10, and then connect the USB-C of MPC-10 to the computer. The indicator light of MPC-10 will flash, indicating that it has entered the firmware upgrade mode.

Step 2: Open "DOREMiDi Upgrade Tool", select USB, select the COM port to MPC-10, and click "Connect".

Step 3: Click "Open File", select the upgraded firmware MPC-10_Vxxx, click "Upgrade", and wait for the upgrade to be completed "Upgrade completed!".

Q:Can the upgrade tool be used on Macbook?
A:No, the upgrade tool can only be used under Windows. It is recommended to use common versions such as Windows10.

Q: How to determine the COM interface?
A: After selecting the COM interface, please try to click "Connect". If it is not a DOREMiDi device, "time out" will be displayed.

Q: After MPC-10 enters the upgrade mode, the computer USB cannot recognize the device.
A: This may be because the computer lacks a driver, please try to install the "Firmware Upgrade Driver". Link: https://www.doremidi.cn/h-pd-48.html?fromColId=104
