

## UTB-21 Pro Firmware Upgrade Method

The USB MIDI To Bluetooth MIDI Adapter (UTB-21 Pro) uses Over-the-Air Technology (OTA) to update the firmware. Users can install OTA software to upgrade the firmware of UTB-21 Pro.

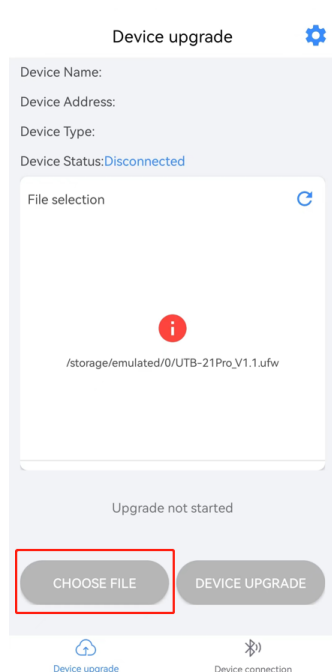

**Operating environment: Android phone, system version 10.0 or above.**

Step 1: Install the OTA software

Send the software "DOREMiDi OTA.apk" to the mobile phone, click to install.

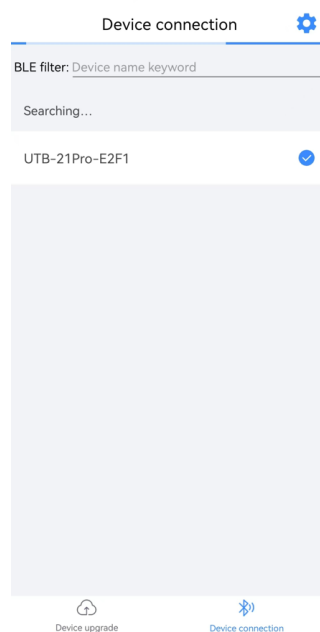

Step 2: Copy the firmware file "UTB-21Pro\_Vxx.ufw" to phone storage and choose this file:

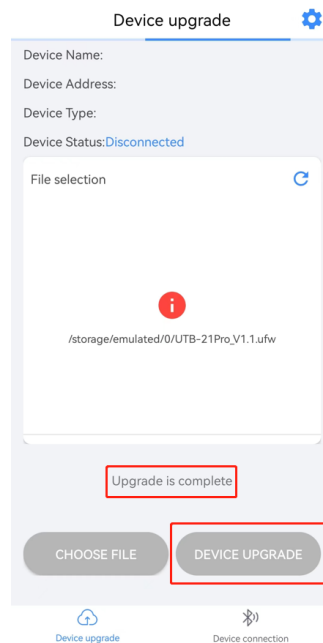

Step 3: Connect UTB-21 Pro

Power on UTB-21 Pro, open the OTA software , click "Device Connection", and connect to "UTB-21Pro-xxxx"

## Step 4: Device Upgrade

In "Device Upgrade", click "DEVICE UPGRADE" and wait for the firmware upgrade to complete.

### Notice:

During the upgrade process, please keep the phone close to the device at a distance of 10cm.

During the upgrade process, do not do other operations
