**Upgrade computer requirements: Windows 7 or later**

Step 1: Enter the upgrade mode

Press and hold the 1 and 2 pedals, then connect to the computer via USB DEVICE, then release the 1 and 2 pedals, the USB DEVICE indicator light flashes, indicating that the upgrade mode is entered.

Step 2: Upgrade the firmware

- Open "**DOREMiDi Upgrade Tool**", select USB, select the COM port of FC-3, and click "Connect".
- Click "Open File", select the upgraded firmware FC-3_Vxxx.bin, click "Upgrade", wait for the upgrade to complete "Upgrade completed!".

Finally power off and restart the product!

Q&A

Q: Can the upgrade tool be used on a Macbook?

A: No, the upgrade tool can only be used under Windows. It is recommended to use common versions such as Windows 10.

Q: How to determine the COM interface?

A: After selecting the COM interface, try to click "Connect". If it is not a DOREMiDi device, "Timeout" will be displayed.

Q: After the FC-3 enters the upgrade mode, the computer USB cannot recognize the device.

A: This may be because the computer lacks a driver, please try to install the "Virtual COM Port Driver". Link: https://www.doremidi.cn/h-pd-61.html?fromMid=360&fromColId=104

If the Win7 driver cannot be installed, please follow this link to troubleshoot the problem: https://www.doremidi.club/articles/4
