

MEMS North Seeking Ultra High Precision Tactical IMU

Application Area

MEMS IMU North Seeking – Leading In China

- Up to 1.5° north seeking accuracy(1 σ)

Ultra High Precision Gyroscope -Comparable To The High End Outside The Abroad

- 0.2°/h Bias stability

Ultra Low Noise

- Low Noise Beyond Fiber Optic Gyro

Ultra Small Volume

- Size of R29 x 298mm

Full Temperature Stable Operation

- Steady Fine Temperature Compensation at -40~85 °C

Flexible Working Interface

- On-demand customization such as SPI/I2C/Serial/CAN
