4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

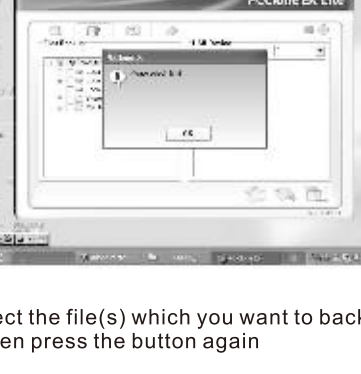

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

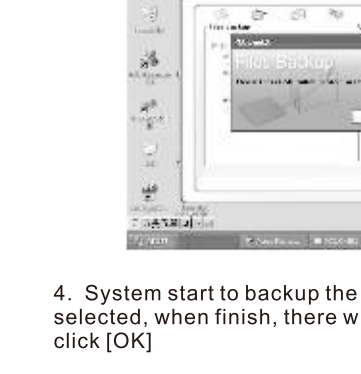

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

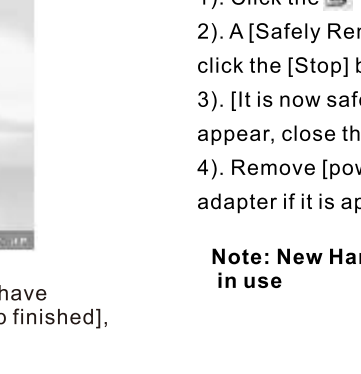

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

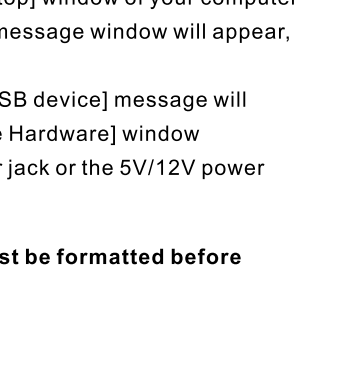

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

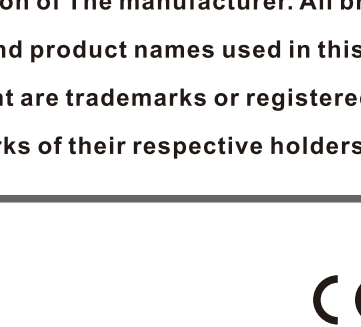

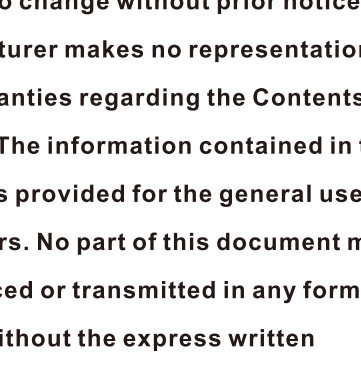

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

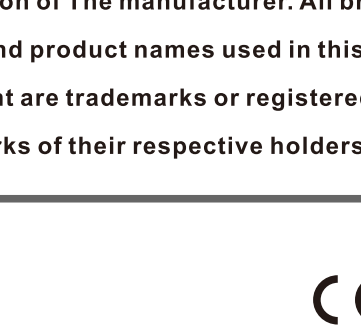

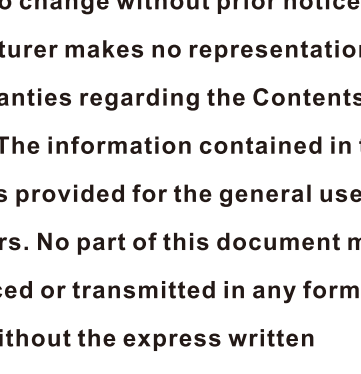

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

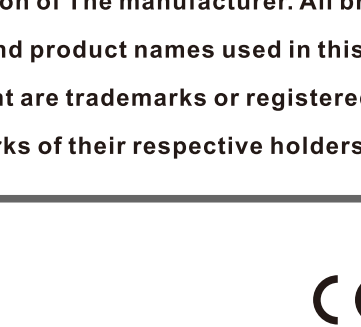

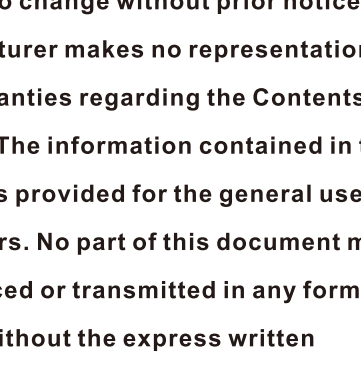

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

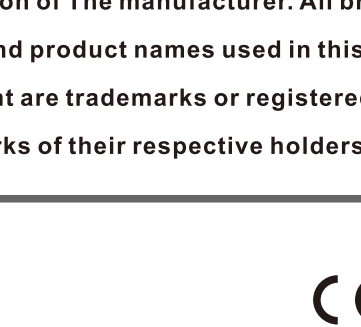

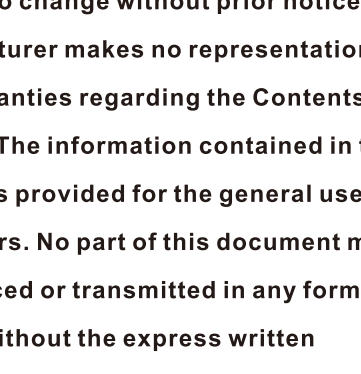

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

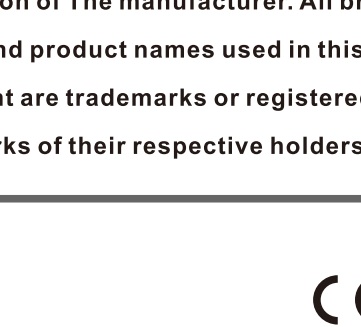

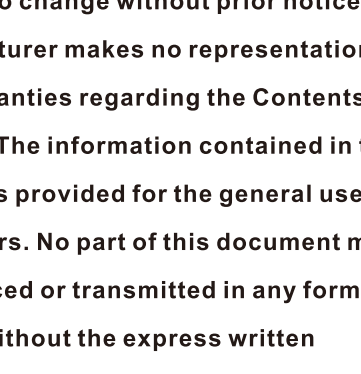

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

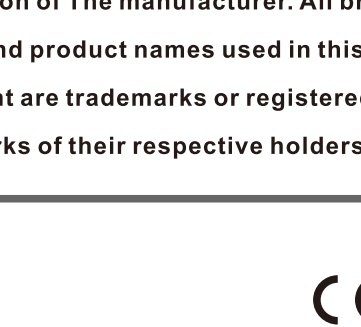

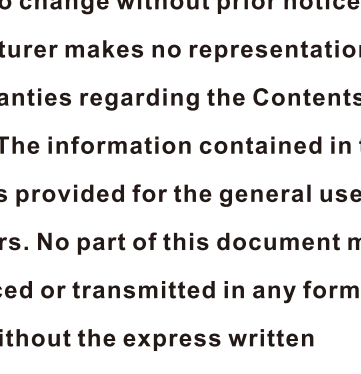

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

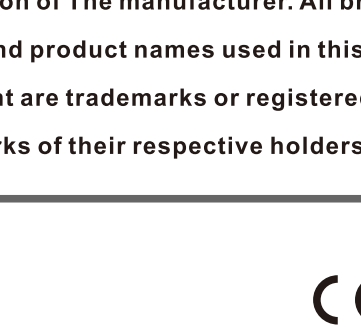

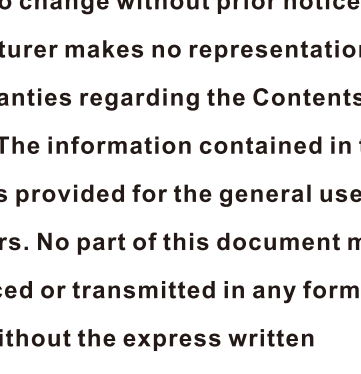

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

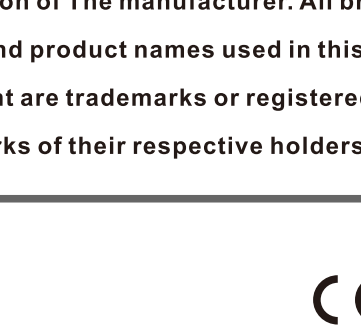

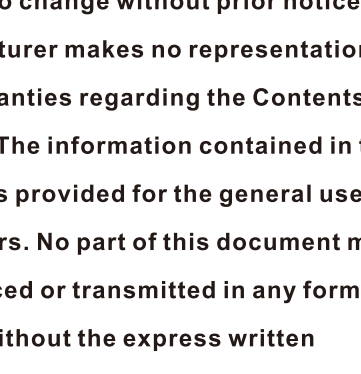

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

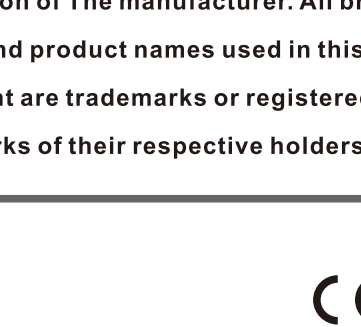

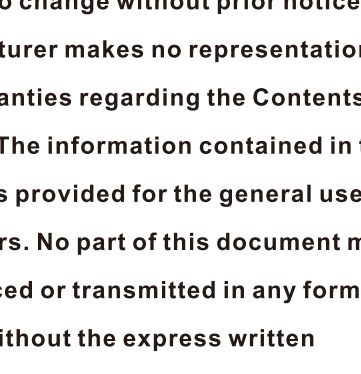

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

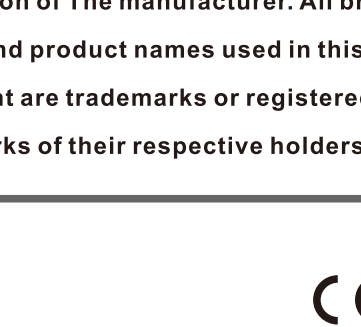

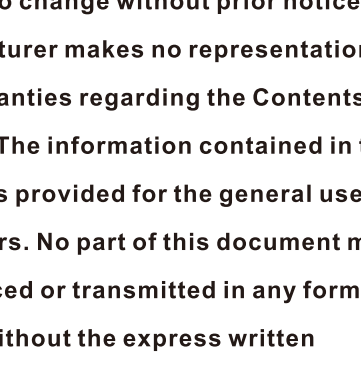

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

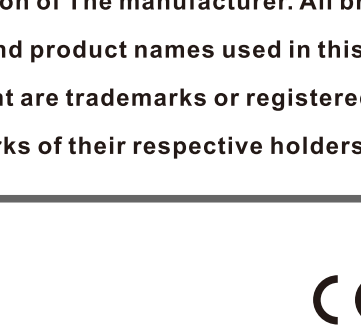

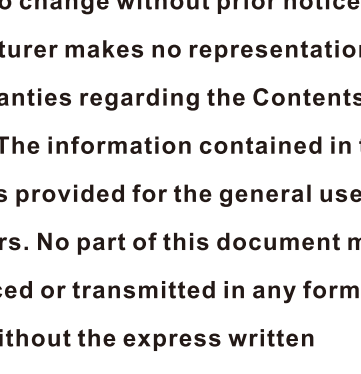

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

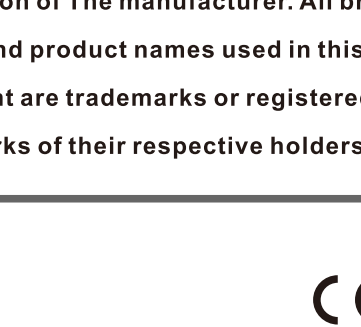

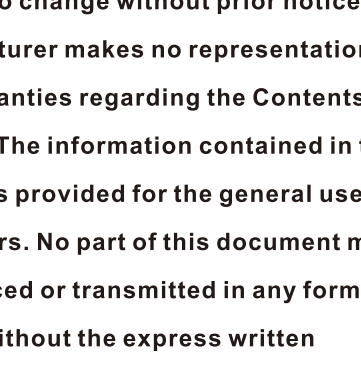

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

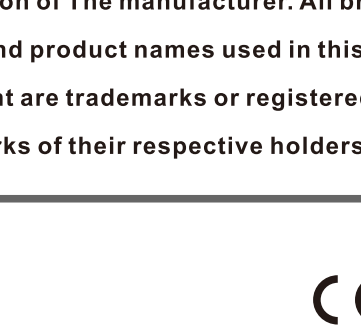

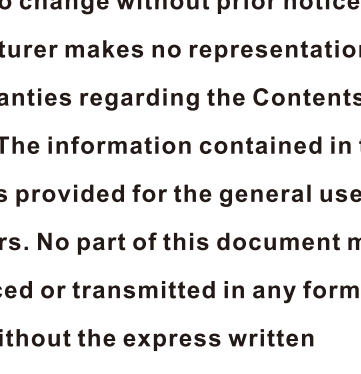

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

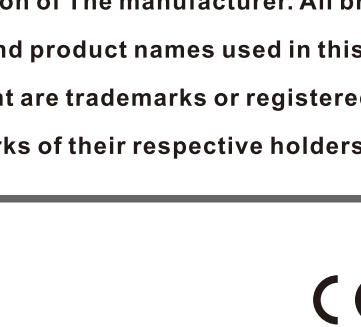

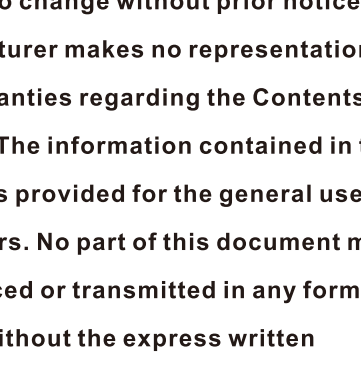

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

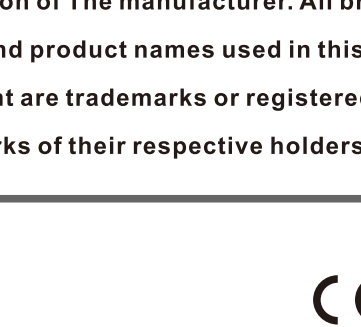

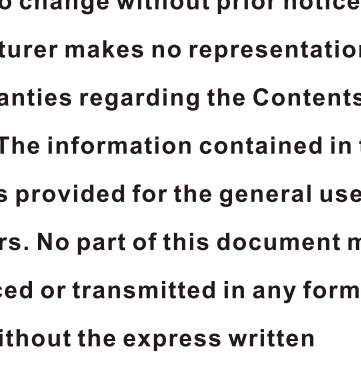

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

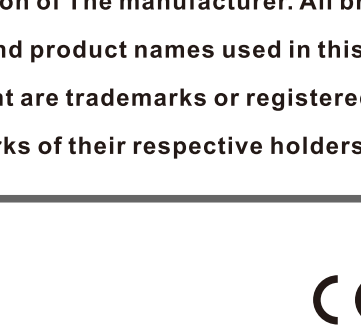

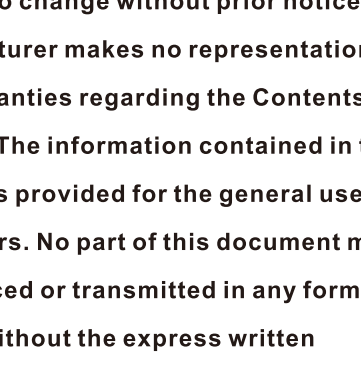

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

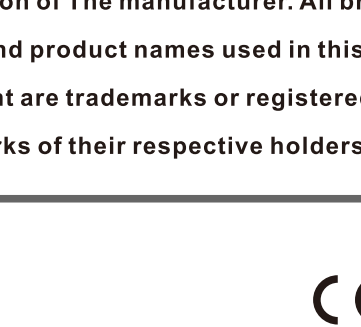

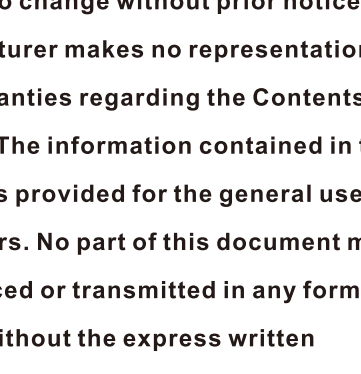

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

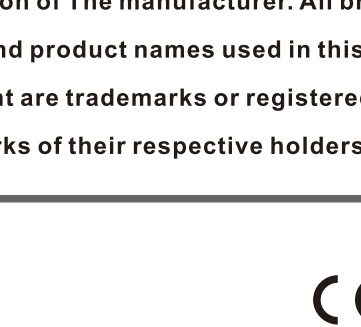

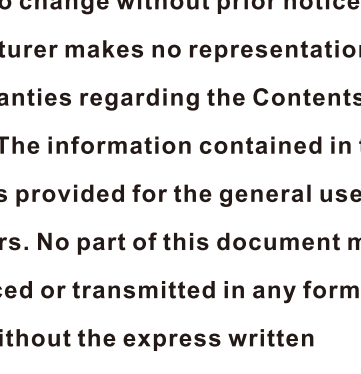

3. Please select the file(s) which you want to backup in the left window, then press the button again

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

4. System start to backup the file(s) which you have selected, when finish, there will display [Backup finished], click [OK]

#### B. Use back up function

1. After finish the installation, on icon will appear on desktop, double click [PCCloneEX], then one window will appear as below:

3. Please select the file(s) which you want to backup in the left window, then press the button again
