

USB drive connection solution

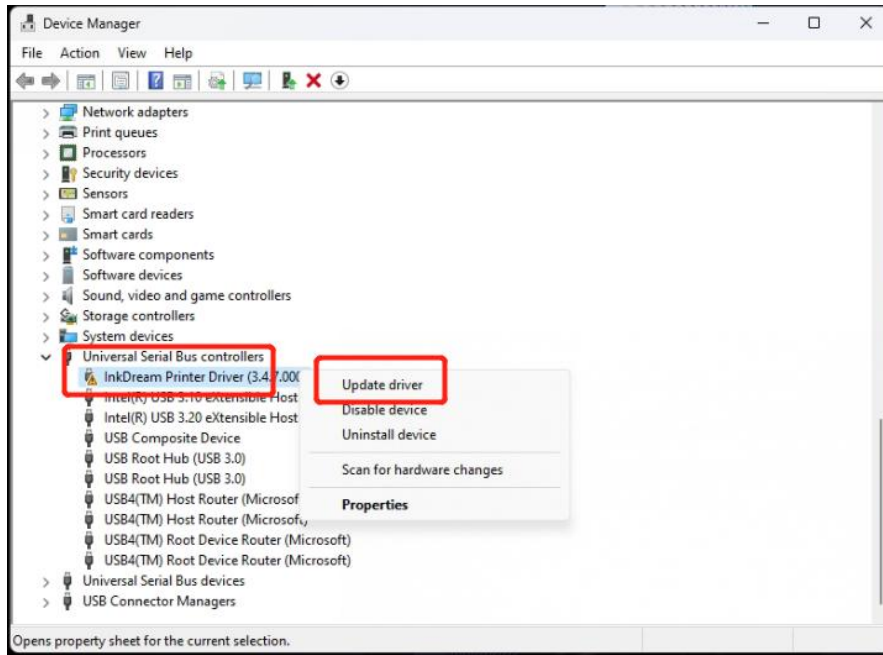

1. Decompress the x64 compressed package.

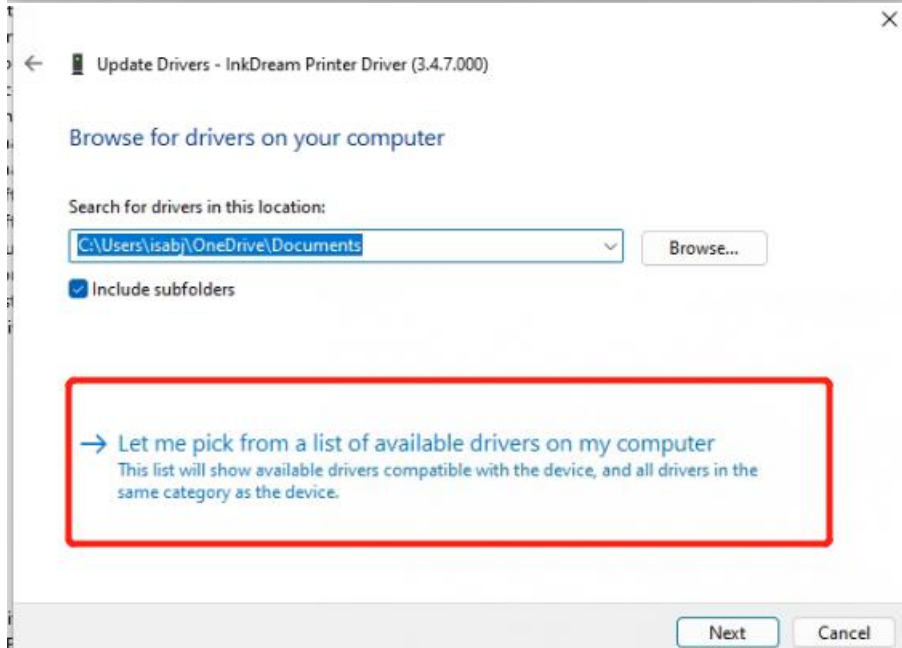

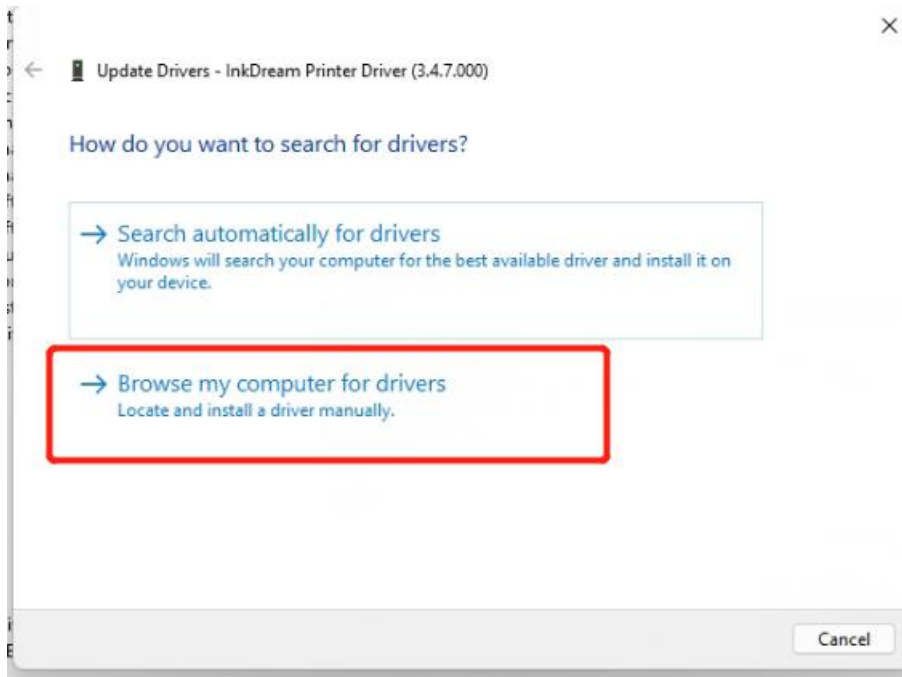

2. Keyboard WIN + R swap out to run Enter devmgmt.msc to open Device Manager or open Device Manager directly.

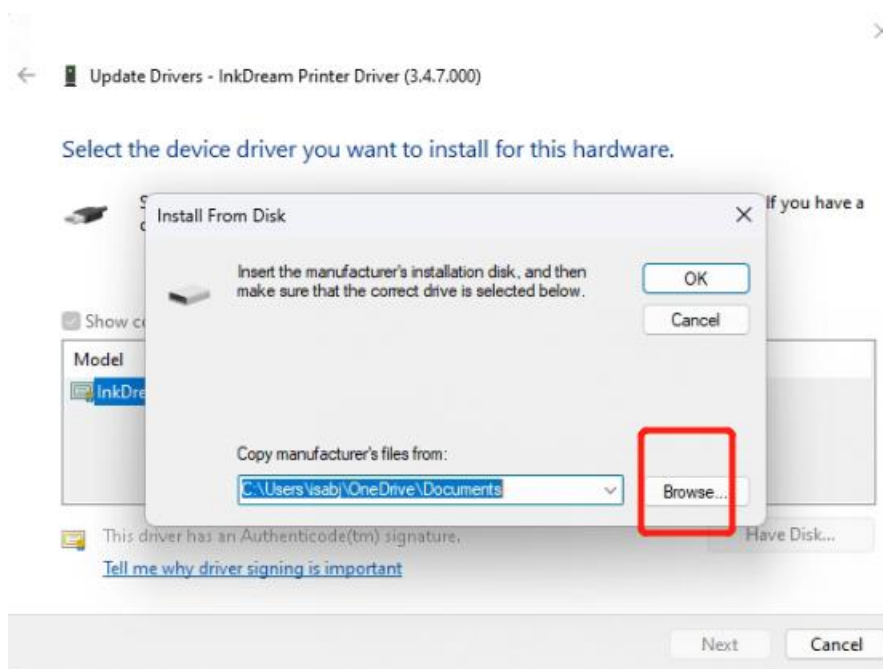

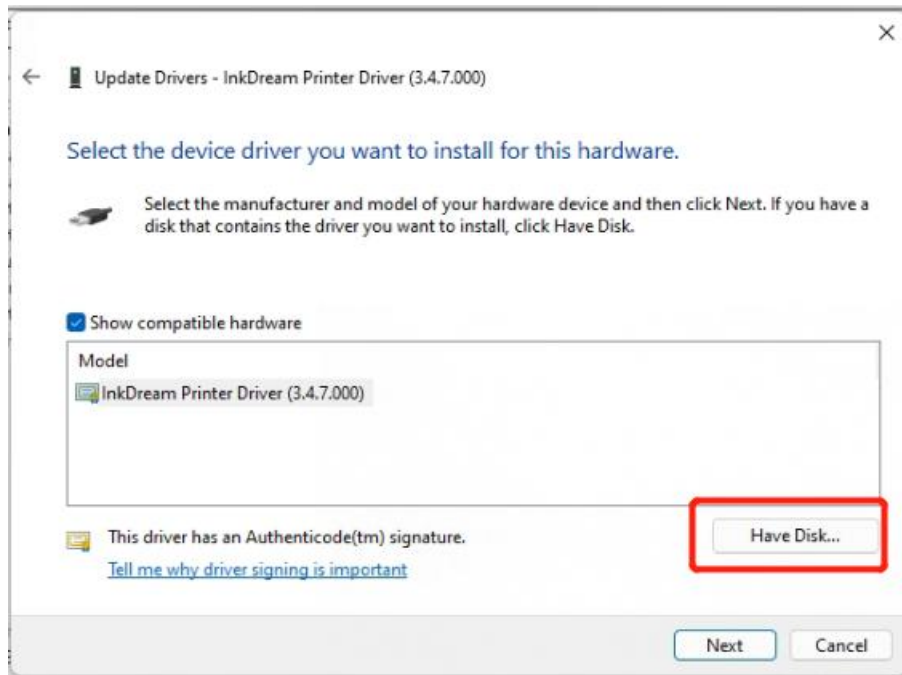

3. Find the yellow exclamation mark PrintDream driver in Device Manager

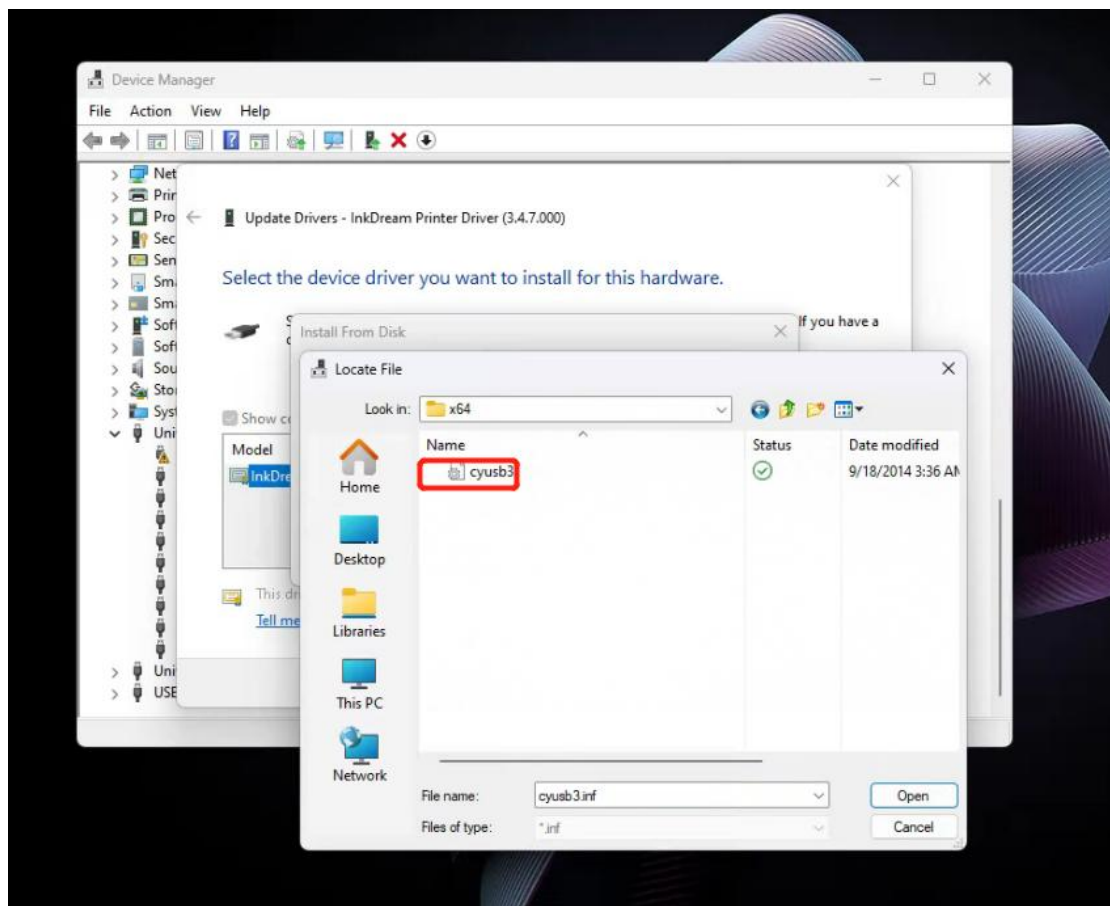

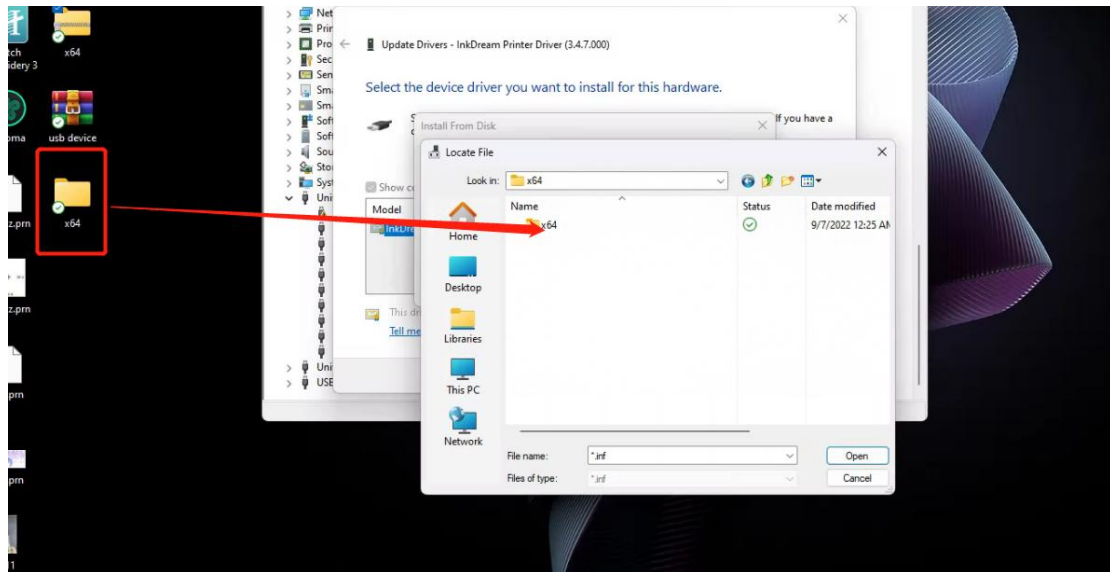

Right-click Upgrade Driver.

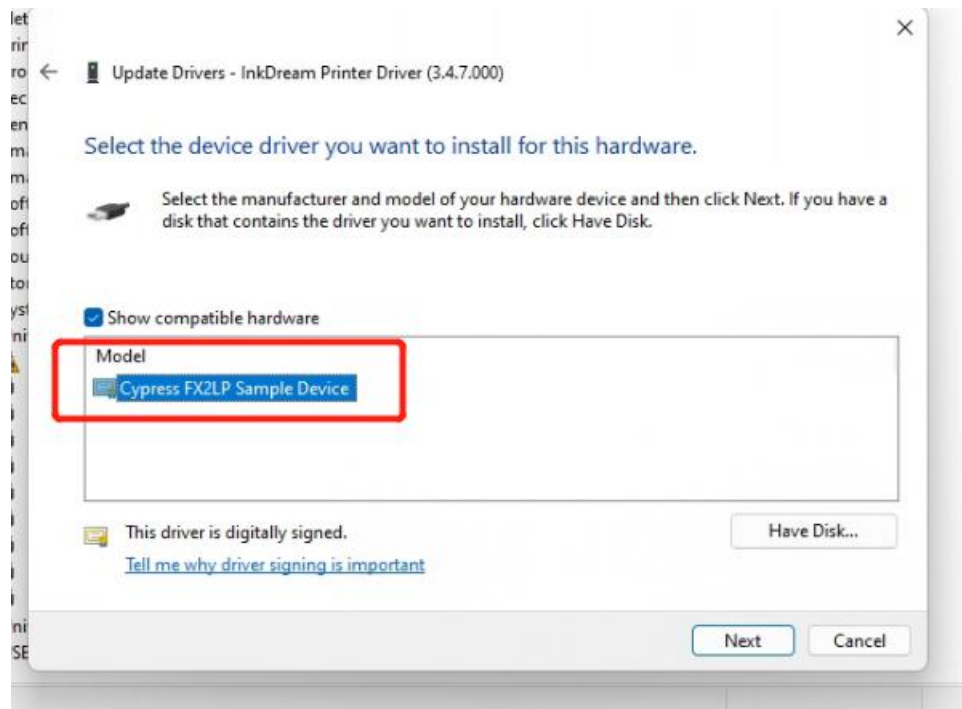

4. Do the following

5. Choose the Cypress FX2LP Sample Device

6. After the installation is completed in the next step, the USB can be used normally.
