## Short description:

Ballista (crossbow) printed in place

## Description:

This is my mini Ballista, everything printed in place. Fires the arrow without problem through the room and further! Easiest loading method is with help of the arrow as seen in the video. Tested with PETG and PLA both with 90% infill and layer height of 0,2mm. Printtime with this settings is about 2 hours. Print and test video: <https://youtu.be/oIYIUPdZJGM> Have fun!

If you can, please use the online documentation found at <http://www.youmagine.com/designs/ballista-crossbow-print-in-place> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
