Short description:

STRIDR

Description:

This BOAT called STRIDR is an excellent way of learning the concept of THRUST. This is the same force airplanes and many more vehicles use to move. Inflate the balloons and regulate how much air escapes through the valve. Place it on the water and use the rudders to control its direction. Learn the mathematical derivation of Thrust force and many other engineering principles at: <http://www.laykanics.com>

If you can, please use the online documentation found at <http://www.youmagine.com/designs/balloon-boat> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
