Short description:

Add some muscle to your ultibot... give him big boy arms!

Description:

SandervG requested I design an accessory for Ultibot. So here it is! Just print standing vertical without support or brim. Then when done simply slide onto your ultibot from the top until it clicks in place. I am doing some designs like there by request. If you would like me to create and share something just let me know and if I have the time I might make it!

If you can, please use the online documentation found at <http://www.youmagine.com/designs/big-boy-arms-for-ultibot-sandervg> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
